LISTS OF INLAND PORTS AND QUAYS ALONG THE SPREE-ODER WATERWAY, FUERSTENWALDE DISTRICT
(69 pp; German; [REDACTED])

25X1A

25X1X These [REDACTED] copies, compiled by the Fuerstenwalde Waterway Office under the Waterway Directorate Berlin, contain information on inland ports and quays and their loading and unloading equipment. The area covered is the Spree-Oder waterway in the Fuerstenwalde district.

Following the cover sheet a location map, scale 1:100,000, depicts the route of the waterway in question and pinpoints the items to follow.

The following five pages are an index of 55 ports and quays, listed in consecutive numerical order, by waterway, kilometer point, right or left bank, property status of installation, and miscellaneous remarks.

The remaining pages list the items mentioned in the index and give detailed information such as water level, type of quay, transshipping capacity, railroad connection, storage facilities, and - rather infrequently - loading and unloading installations, number of workers employed, and 1949/50 financial status.

25X1A

Three detailed location maps of individual items are attached: for the Karl Mahler quay in Fuerstenwalde, the former W. H. Lange quay [REDACTED] and the g quay at the gas works in Fuerstenwalde.

Detailed information sheets are missing for items 49 through 51 and 54. for item
